

# Social Autopsies Worksheet

## **Situation: What happened?**

I wanted to get to know Marta. I tried asking her questions, but sometimes she doesn't answer me so I touch her body. Then she pays a lot of attention to me and talks to me, but usually she is angry. Other people seem to think it is funny and a good way to get her to like me.

## **What was the social error?**

I touched her back and bum without her permission.  
I made her embarrassed in front of other students.  
I never thought that maybe she just didn't want to talk to me.  
I did not think she did not like me because I liked her so much.

## **Who was hurt by the social error?**

Marta

## **What should be done to correct the error?**

I should write an apology letter to Marta and promise not to touch her again.  
I will not touch her again, nor do things that make other students laugh at us.

## **What could be done next time?**

First, because she is very upset and mad at me, I will not talk to her for a while, unless she talks to me first. When I ask her questions next time, I will stop asking if she does not answer me or walks away. If other students tell me to do something that I am not sure about I will talk to Mr. \_\_\_\_\_.

If other students are laughing at me, it may be because I am doing something wrong, and not just funny, so I should stop and talk to Mr. \_\_\_\_\_.

I will not touch someone else again until they tell me that it is okay with them.
